FT-200 Rugged Field Tablet - Product Specification

Meridian Infra Ltd - Field Equipment - Datasheet rev. B

Overview

The FT-200 is an 8-inch rugged tablet issued to field engineers for meter installation, inspection and asset surveys. It runs Android 14 with the Meridian Field app preinstalled and is managed through the company device management service.

Power

Battery: 10,000 mAh lithium-ion, hot-swappable. Typical runtime is up to 14 hours of mixed use with GPS and mobile data on, or 9 hours with continuous barcode scanning. A full charge takes about 3 hours with the supplied 30 W adapter. The vehicle dock charges the tablet while driving.

Display

8-inch IPS panel, 1920 x 1200 pixels, 800 nits peak brightness for direct sunlight, glove and wet-touch modes, Gorilla Glass Victus.

Durability

IP67 ingress protection: dust-tight and protected against immersion in water up to 1 metre for 30 minutes. Tested to MIL-STD-810H for drops of 1.5 metres onto concrete, vibration and temperature shock. Operating temperature -20 to 60 degrees Celsius.

Connectivity and sensors

4G LTE and 5G sub-6 GHz, Wi-Fi 6, Bluetooth 5.3, NFC, dual-band GNSS (GPS, NavIC, Galileo) with 1.5 m accuracy, 1D/2D barcode scanner, 16 MP rear camera with flash.

Warranty and support

Three-year comprehensive warranty including accidental damage. Faulty units are replaced by the next working day in metro cities and within three working days elsewhere. Raise requests through the IT service desk.
